

TRANSFIELD WORLEY LIMITED PROFESSIONAL ENGINEERING SCHOLARSHIP 2011

Introduction

Enclosed is an application form for the Transfield Worley Ltd. Scholarship for Professional Engineering. Transfield Worley Limited is providing three Scholarships to students about to begin an Engineering degree at a University in New Zealand. The Scholarships are designed to assist the young people of Taranaki, Hawke's Bay and Whangarei to further their ambitions and opportunities toward a career as a Professional Engineer.

Scholarships

The Scholarships will have a value of \$5,000 each, which will be paid in four annual instalments of \$1,250. Students may be given the opportunity to undertake part of their required professional work experience for their degree at Transfield Worley after completion of their 3rd year of University study. Each recipient will also be appointed a Graduate Engineer as a mentor from Transfield Worley's Graduate Development Organisation (GDO) who will maintain a relationship with the recipient throughout their time at University.

Criteria and Requirements

To be eligible to apply, students must be a New Zealand Citizen or Permanent Resident concluding their schooling at a Taranaki, Hawke's Bay or Whangarei secondary school this year and attend one of the five Engineering Universities in New Zealand in 2011 as a full time student. Students are encouraged to apply whether they have been accepted into a course or are still awaiting confirmation; proof of acceptance and enrolment will only be required at the time of payment of the Scholarships.

Applicants must submit a brief CV, a copy of their latest NCEA results and have a proven academic background and a commitment to study. Applicants must also submit one character reference (preferably from a member of the school staff) which supports their application.

The successful applicants will display the following qualities:

- Be an 'all-rounder'
- Good academic achievement
- School and community involvement
- A commitment to pursue a career as a Professional Engineer
- High level of drive, commitment, enthusiasm and integrity
- Excellent communication skills (both written and oral) and an ability to relate well to others

All candidates will be considered and short listed candidates will be interviewed by phone. If the need arises, there may also be a face to face interview as part of the process. Representatives from the Transfield Worley GDO will be responsible for shortlisting and selecting the Scholarship winners. Transfield Worley reserves the right to make the final decision on awarding each Scholarship.

The first payment will be made after the recipients provide Transfield Worley with evidence of acceptance and enrolment in an Engineering degree. The recipients will then be required to submit evidence of passing their papers each year and continuing full time study toward their Engineering degree for the award to continue.

Please complete the enclosed application, attach all supporting information, and return by post to the Transfield Worley contact listed below by 8 October 2010. You will be advised by letter of the decision by the early November 2010.
